ACVR Residency Training Program Application

This document is to act as a guide for institutions desiring ACVR accreditation of their residency training program. It should be used in concert with the requirements set out in the ACVR Essentials of Residency Training document and it follows the headings of that document. It is intended to streamline the application process and help define what information the RSEC needs to evaluate the program. All terms used in this application have same definitions as defined in the Essentials.

Institution Name:
University of Florida

Email
fvilplanagrosso@ufl.edu

Objectives:

Succinctly state the objectives of the training program.

1. Training in the research investigative methodology by completing and presenting a prospective or retrospective diagnostic imaging project that either addresses a clinically relevant or basic science question related to the field of veterinary diagnostic imaging.
2. Training in scientific writing. The resident is expected to apply for ACVR resident research project funding for their project by the middle of their first clinical year.
3. Advanced training in diagnostic imaging.
a. Develop clinical skills in diagnostic radiology.
b. Develop clinical skills in special procedures including fistulography, fluoroscopic evaluation of dynamic processes (swallowing, tracheal evaluation) and routine special procedures (evaluation of the gastrointestinal and urogenital systems).
c. Develop interpretative skills in selective angiography and interventional radiography.
d. Develop clinical skills in small and large animal diagnostic ultrasound, computed tomography, magnetic resonance and nuclear imaging.
e. Receive instructional training in the physics of radiography, alternate imaging modalities (including ultrasound, computed tomography, magnetic resonance imaging, and nuclear medicine), radiobiology, radiation protection, and radiation dosimetry and safety. Radiation safety, radiobiology and physics of diagnostic imaging are taught during the first year and will be taken with the MD diagnostic imaging House Officers at the University of Florida, College of Medicine.
4. Training in critical current literature evaluation through the participation in weekly journal club.
5. Participate in the clinical training of veterinary students during their radiology clerkship rotations (VEM 5783), occasionally in didactic courses and elective courses.
6. Training in the presentation of current relevant research data through abstract submission and presentation at appropriate scientific presentations. This would include the presentation of a current research project at the Annual House Officer’s seminar as well as the submission of an abstract and presentation at the Annual ACVR meeting.
7. Preparation for qualifying and certifying examinations offered by the American College of Veterinary Radiology by three Mock written examinations during the first year, three Mock written examinations during the second year (in preparation for the certifying examination) and weekly Mock written examinations (Known Case Conference – in preparation for the certifying examination).
8. Develop appropriate communication skills with clinicians and referring veterinarians.
ACVR Residency Training Program Application

Training Period:

What is the total length of the training program?

3

What are the responsibilities of the resident in the remaining non-clinical portion of the program?

The non-clinical portion of the program will be used for ACVR board preparation, lecture preparation, completion of resident research project, attending clinical rounds, known case conference and vacation. Externships and attendance to courses may be also considered during the nonclinical portion of the program.
Direction and Supervision:

Program Director:

Who is the Director of Residency training?
Federico Vilaplana Grosso

What percentage of this individual's time is committed to clinical service and teaching of residents?
75%

Faculty:

Please list the faculty member of the program accepting PRIMARY responsibility for training in each of the following core areas:

Roentgen diagnosis
Federico Vilaplana Grosso 75%

Diagnostic ultrasound
Federico Vilaplana Grosso 75%

Computed Tomography
Aitor Gallastegui 80%

Magnetic Resonance Imaging
Elisa Spoldi 75%

Nuclear Medicine
Erin Porter 65%

List the names and percentage clinical commitment of additional imaging faculty in the program, and their area(s) of instructional responsibility.
Robson Giglio - 45% Clinics
Matthew Winter -15% Clinic

Using the button below, please provide a one page CV documenting their expertise in the area(s) of assigned responsibility for each imaging faculty in the program.

For each speciality colleges listed below pleas list at least two Diplomates of these colleges who can be expected to regularly interact with radiology residents:

ACVIM
Richard Hill
Affiliation Agreement:

Using the button below, provide a copy of the affiliation agreement(s) in place if all of the training will not be accomplished on-site. Include the scope of the training and amount of time the resident will be away from the home institution.

ACVR Residency Training Program Application

Facilities:

Briefly describe how the program meets the facility requirements.

Facilities include small (5 rooms) and large animal (2 rooms) diagnostic radiology, interventional suite with DR video fluoroscopy and digital subtraction, complete digital radiography system (6 DR Canon Plates), portable radiology units (2 equine and 1 DR plate portable unit for small animal surgery), three real-time B-mode ultrasound with pulsed wave Doppler, power and color
Doppler and elastography, 160 slice Toshiba Acquilon Prime helical multidetector-row computed tomography and 1.5 T Toshiba magnetic resonance imaging is
available. The CT and MR have both small and large animal capabilities. The imaging service remains paperless and film less department with 12 fully integrated diagnostic imaging workstations (one of which has [4] 3MP monitors and eleven of which have [2] 3 MP monitors). The hospital uses PACS (Merge® PACS) and RIS (Empiric® Fuji) system for full integration of all imaging modalities and reporting. Direct dictation systems are used for each workstation based on a server driven Dragon Medical Nuance software program.

Ultrasound

Philips Epic 5 with 3 transducers (C9-2 MHz, L15-7iQS, C8-5 MHz, C5-1, L18-5 MHz, L12-5 MHz).

Philips iU22 with 4 transducers (C8-5 MHz, Lio12-15 MHz, L8-15 MHz and C9-4 MHz probes).

Samsung RS85 (C4-9 MHz, L3-12MHz, L3-10MHz, L4-18 MHz).

Samsung RS80A with Prestige ( C1-7 MHz, C4-9 MHz, L3-12MHz, L3-10MHz,L4-18 MHz).

Computed tomography
Toshiba Aquilion Prime®, 160 Multi-detector helical CT unit with CT fluoroscopy.

Small animal radiography

SA Radiography room one
Quantum Medical Imaging overhead tube, CPI generator (1000 mA,150 kVp) with Control X floating bucky table and wall bucky. CanonDR 17” x 17” plate. Routine small animal radiography.

SA Radiography room two
Secdecal x-ray machine (800mA, 125 KVp) with floating table-top. Canon DR 17” x 17” plate.
Routine small animal radiography.

SA Radiography room three
Secdecal x-ray machine (800mA, 125 KVp) with floating table-top. Canon DR 17” x 17” plate.
Routine small animal radiography.

SA Radiography room four
Secdecal x-ray machine (800mA, 125 KVp) with floating table-top. Canon DR 17” x 17” plate.
Routine small animal radiography.

SA Radiography room five
Sedecal x-ray machine (400mA, 125 KVP) with floating table-top. Canon DR 17” x 17” plate. Emergency/ICU small animal radiography. SA Post-operative surgery portable mobile x-ray unit

One Sedecal portable high frequency mobile x-ray unit with Canon DR 17” x 17” plate. Full Dicom integration with PACS and RIS.

SA Special procedures

Phillips radiographic/fluoroscopic system with overhead tube (1000 mA 125 kVp). Medrad Mark-IV® and Mark VII pressure/powerinjectors for CT angiography and interventional radiography. Routine small animal radiography and special procedures.

Large animal radiography

LA Radiography room one
CPI Indico high frequency generator (1000 mA, 150kVp) all-purpose machine with a custom slaved cassette holder system. Routine large animal radiography and special procedures.

LA Radiography room two
Sedecal high frequency generator (800 mA, 150kVp) all-purpose machine with a custom slaved cassette holder system. Routine large animal radiography and special procedures with wall Bucky tray for horizontal beam thorax and other radiographic procedures. Routine large animal radiography.

Two portable high frequency machines are available for stall side and intraoperative radiography.

Magnetic Resonance Imaging

Toshiba Titan 1.5 T, 16 channel, 33 mT/m gradient MRI unit. In addition, there are 3T, 4.7T, and 11T units available for small animal (rodent) imaging at the University of Florida McKnight Brain Institute.

Nuclear Medicine

MIE Scintron® VI with mobile stand for equine and small animal nuclear medicine. Large field of view gamma camera with dedicated computer system and software (Scintron® dedicated nuclear medicine acquisition and processing software).

Radiation Therapy

An isolation facility for the routine treatment (I-131) of hyperthyroid cats is available. External beam radiotherapy (Varian 2100 EX) including a full CT guided radiosurgery treatment facility (6 MeV photon and variable energy electron beams) and
ACVR Residency Training Program Application

Clinical Resources:

**Indicate the approximate number of patients seen annually by the home institution?**

52430

**What is the annual imaging caseload?**

17451

Indicate in percentages the approximate breakdown of the patient population according to species.

Please check which of the following types of imaging cases the residents will have exposure to during the residency:
ACVR Residency Training Program Application

Training Content:

What percentage of imaging reports are typically available within 48 hours after the examination is conducted in typewritten or electronic form?
90%

Of the preliminary reports generated from the imaging caseload what percentage are initially produced by the resident?
99%

What percentage of the resident reports are reviewed by the imaging faculty prior to finalization of the report?
95%
When preliminary resident reports are reviewed and edited by the imaging faculty responsible for training, what percentage of the time are two or more faculty present?

60%

For each category below, approximate the number of cases a single resident will be involved in the interpretation of during the course of the entire program.

**Type a question**

- Small Animal Radiology: 4700
- Large Animal Radiology: 620
- Abdominal Ultrasound: 1800
- Computed Tomography: 800
- Nuclear Medicine: 50
- Magnetic Resonance Imaging: 380
- Elective (any of above):
  - Required elective (specify): 150 (fluoroscopy)

Total: 8500

Please indicate the course number and unit assignment residents are required to take to meet the educational objectives for formal instruction as outlined in the Essentials in the following:

**Radiobiology**

NA

**Nuclear Medicine**

NA

**Ultrasonography**

NA

**CT**

NA

**MRI**

NA

If your program does not offer formal courses in any or all of these topics please indicate how these educational objectives for each are met. Use the button below to upload additional information as necessary.

A medical physics course is taught by the physicists at the medical school that is taught each year. The radiology residents take this course the first year of the residency but receive no official credit for the course (no official course number). This course includes radiation safety and...
radiobiology as well as all aspects of the physics of medical imaging for all modalities.

**Research Environment:**

*Over the last five years, what is the average number of peer reviewed publications, on which the IMAGING faculty listed under Direction and Supervision in IV, are included as authors?*

5-7/year/author

*What is the number of publications/submissions expected of a resident completing the program?*

1

*If this is an established program, what percentage of residents have made formal research presentations at the annual ACVR or equivalent national meeting?*

3/7

*Is an advanced degree a requirement of the training program?*

No

**ACVR Residency Training Program Application**

**Educational Environment:**

*How many lectures or scientific presentations are expected of each resident during the course of their training?*

3
ACVR Residency Training Program Application

Evaluation 'Evaluation of residents and protection mechanisms':

Did all of your current resident(s) adequately complete the last six months of training?

**Yes**

List the current members of the residents' review committee.
Federico Vilaplana Grosso
Aitor Gallastegui Menoyo
Erin Porter

List the internal mechanisms in place to protect your resident if conflicts arise.
1. Direct communication between the resident and the individual
2. Intervention with the resident advisor between the resident and the individual with resident advisor as intermediary
3. Intervention with the residency program director between the resident and the individual with residency program director as intermediary
4. Intervention with the department chair if needed
5. Intervention with the resident/intern committee if needed
6. Intervention with human resources department within the college of veterinary medicine if needed
ACVR Residency Training Program Application

Teaching File:

What is the nature and scope of the teaching file available to residents?
A teaching file of interesting cases is maintained in the radiology office and online using our RIS and PACS systems. An imaging PACS archive with all DICOM cases was begun in 2005. Currently 15 years of digitized cases are available that are catalogued and searchable in RIS including over 200,000 cases.

How is it maintained/updated?
This is maintained when faculty are reviewing cases in rounds with the residents and keywords are added to the report along with specific codes (KCC, etc.) that are all searchable. The RIS has a robust search function that allows one to search via terms in the description, conclusion, keywords, as well as by species, modality and body parts.
Conferences:

On average how many Known Case Conferences are conducted annually?

50-52

Literature Resources:

What is the geographic relationship between the nearest medical library and the training program?

Small library in the veterinary teaching building and on campus (health science center - about 3/10 of a mile away).

Residents have direct access to all eJournals and electronic books on line from any computer in the college and home.
Appendix:

Provide the pass rate for first time, second time, etc for both the preliminary and certifying exams for your residents for the past 5 years. For example, for all residents finishing your program 5 years ago (Year 5): x number passed prelim 1st time, y number passed certifying exam 1st time, z number was unsuccessful.

Provide a clinical schedule for your resident(s). This schedule should provide a weekly or monthly outline of the resident’s clinical responsibilities. This may be in the form of a master schedule or duty roster for your entire radiology section if desired. Use the button below.
